

# KPIS Planetarium Club News:

Dear, Parents

We're some of the members in the KPIS Planetarium Club. Our club will make KPIS be the main information center of this community. Now, we have spent about 4 weeks working together. We separated into 3 groups; scripting, modeling, and Photoshop. The reason that we're separating into 3 groups is because we can working for many task in the same time. We had a nice start for our groups. Mr. Robert is our planetarium club advisor. He has put a lot of effort into this club. Right now our club has about 25 people. If anyone is interested in join our Planetarium club, please come!! We'll met every Tuesday and Thursday at Mr. Robert room, from 3.20-4.40. We're so excited to have more people in our club. We hope that you're interested in our Planetarium Club!!

Here are some pictures for you to enjoy!!

## Other Events:

On November 1<sup>st</sup> and 2<sup>nd</sup>, the KPIS Kindergarten classes blasted off to the planets of the solar system! With Teacher Rob steering the ship, and Teachers Marilyn and Charles as First Officers, both kindergarten classes cruised Mercury, Venus, Mars and past the rings of Saturn to Pluto and its neighbors!

Time jumps were necessary for the demonstration of the night sky's changes with respect to season, and celestial gods were conjured to help remember constellations and star patterns. We apologize if your kindernaut was returned slightly out of phase, but traversing time and space is not easy! All had a blast, and learned a lot about our COSMOpolitan neighbors!

Cheers to the kindernauts!

Sincerely,

Teacher Rob Russell
