

Newsletter for Grade 2

Ms. Belinda from SCAD with Grade 2

Dear Grade 2 Parents,

We finished our unit on dogs. Ms. Belinda from Soi Cats and Dogs (SCAD) came to visit us early in November. She talked to us about the needs of animals and about the stray dog and cat problem in Thailand. Some of you were very generous with your donations of dog and cat supplies. Thank you. Some of the Grade 2 students also made a video to show you what they learned. I am making copies of it and will give them to you soon. In science, we finished talking about how living things grow and change. Now we are talking about the earth's land, air and water. We are also discussing pollution and how to protect Earth by reducing, reusing, and recycling. In math, we finished studying about money. Now we are learning about mental math. In social studies, we are studying all about Earth: geography, neighboring countries, landforms, seasons, and weather. In Language Arts, we have been practicing creative writing and descriptive writing. Some Grade 2 students have written stories about their dogs, trips, people, places, and other things. Right now we are also discussing nouns and proper nouns.

Exams are coming soon. It's time for students to begin reviewing. I am sending a study guide to you. Thank you for your support!
